

RG/FOOT LOOP

FOOT LOOP

Our foot loop comes with an elastic band to keep the user's foot in the loop to provide a smoother ascending process.

Designed to be used with the RIDGEGEAR hand ascender for rope ascents. The foot loop is rigid to make it easier for the user to step in, the elastic then ensures the foot stays in place. It has an adjustment buckle on top to help arrange the length of the webbing to provide maximum comfort.

Material: Polyester webbing, steel buckle

Weight: 99g

Adjuster

Elastic strap
