## RGH5

### RESCUE HARNESS

The RGH5 is designed for use as a confined access harness. When used, the rescue strap keeps the operative in a near vertical position, which is preferred when recovering an unconscious casualty.

The front and rear attachment points can be used as standard fall arrest points. The rescue strap can be used for lifting and lowering, and also be used in certain fall arrest situations. High contrast stitching makes inspection easier. The addition of a flexible rear D pad provides additional comfort. The inclusion of easy slide shoulder buckles increases the speed and range of adjustment. Tail tidies allow for convenient and neat storage of excess webbing following adjustment. The way the harness has been designed minimises the amount of rigid webbing edges.

- / Front & rear attachment points
- / Rescue attachment point with hook and loop fastening
- / Tail tidies

Accredited to: EN 361:2002  
EN 1497:2007

Web material: 45mm RIDGE Protect polyester\*

Max user weight: 140kg (when the max. force on the user/anchor is limited to <6kN)

Fittings: High tensile steel alloy

Weight: 1.2kg standard buckles  
1.4kg fast fit buckles

\* 14 times reduction in bacterial growth, according to ISO 20743:2013 contact with *K.pneumoniae*, commonly associated with healthcare infections such as *E.coli*
