

RGL6

SINGLE LEG ELASTICATED WEBBING LANYARD & SHOCK ABSORBER

This single leg lanyard comes with an elasticated leg. This decreases the hanging slack, which can help to reduce trip hazards and entanglement.

An industry standard, and usually the minimum equipment issued/required with a harness for anyone working at height.

This lanyard should be used when the operative is working from a static position, connected to a fixed anchor point.

The shock absorber pack will deploy in the event of a fall limiting the impact force on the user.

Shock absorber

Accredited to: EN 355:2002
